

Hospital Chair Bulletin #2

As your Hospital Chair for Department of Washington 2026 -2027 calendar year, I wish to continue to educate, inspire, motivate all the VFW Auxiliaries in Washington State.

School of instruction has provided new insights on where some thoughts of support should be directed. It is my goal to follow up on any concerns and I hope to provide assistance where needed in support of the current Hospital Ambassador, VAVS / CDCE representatives, outreach for hospital volunteers, as well as VFW Auxiliary members. I am still committed to promoting enthusiasm, outreach support and volunteerism by working growing succeeding together!

One of the immediate focuses needs to be on funds donated to the hospital program. Educating why hospital obligations should be paid at the beginning of the year, what those funds are used for and how those funds are used throughout the year.

I need to affirm and introduce two forms for the hospital program. One being the monthly reporting and the other being the end of year report. Currently more than one form is being used for this task. It is my goal to streamline this process and to be consistent. More information on this soon!

My calendar is also a priority as I have begun Hospital, POST and Auxiliary visitations. The calendar for annual hospital visitations has been brought back to the VFW Auxiliary for coordination. I plan on providing another update to this bulletin with the posting of my projected calendar for the year.

It is so inspiring to see the ideas for our themed hospital visitations getting lots of excitement. People are working so hard to make this a success! I personally can not wait to see the pictures posted. You guys are terrific! This really is an incredible program. I'm so looking forward to meeting and working with all of you.

Together is Better!

This really is a team effort! Without all of you and your support of this program, and of each other, this program could not exist. I'm completely moved and inspired by what you share each and every day! Thank you all so much!

Our goals are still simple, educate on what the hospital program is, promote how anyone can help or participate with this program, recruit the ideals and principles of this program, ensure the continued success of the hospital program for the State of Washington.

Never forget as part of the VFW Auxiliary Hospital program, you can, and do make a difference for our veterans!
Come on Washington, let's Do This!

Please feel free to contact me directly with any questions or concerns you may have, I'm here to help.

Yours in Service,

Emily Arnold
