Veterans and Military Members Suicide Prevention Account

Washington is home to 544,290 Veterans, 78,640 service members, and over 2,000,000 military and Veteran family members. Despite being just 7% of Washington’s population, Veterans account for 18% of total suicides in the state.

To help in this fight, Washington is cultivating many community programs dedicated to providing peer services. These upstream, peer-support models are proven to assist Veterans and military members in addressing mental health concerns and preventing military and Veteran suicide.

Funding for these programs will come from the Veteran and Military Member Suicide Prevention Account. This account will consist of funds appropriated by the legislature, revenues received from the Prevent Veteran Suicide emblem, and **all receipts from gifts, grants, or other donations from public or private sources.**

How will the funds be used?

Funds from this account will be used in the fight against veteran and military member suicide, and will include:

- Expanding the Washington State Department of Veterans Affairs’ Peer Corps Program.
- Providing programs, peer support, and services that assist Veterans and military members in addressing mental health and wellness impacts of military service, trauma, moral injury, and transition to civilian life.
- Funding the Suicide Prevention Community-Based Service Grant Program.

Suicide Prevention Community-Based Service Grant Program

The State Legislature created this program to award grants to community organizations who provide suicide prevention, peer support, and other assistance to at-risk and transitioning Veterans, military members, and their families in their communities. Peer support models of suicide prevention will be prioritized.
